How to remove OctoinCoin wallet (OS Windows)

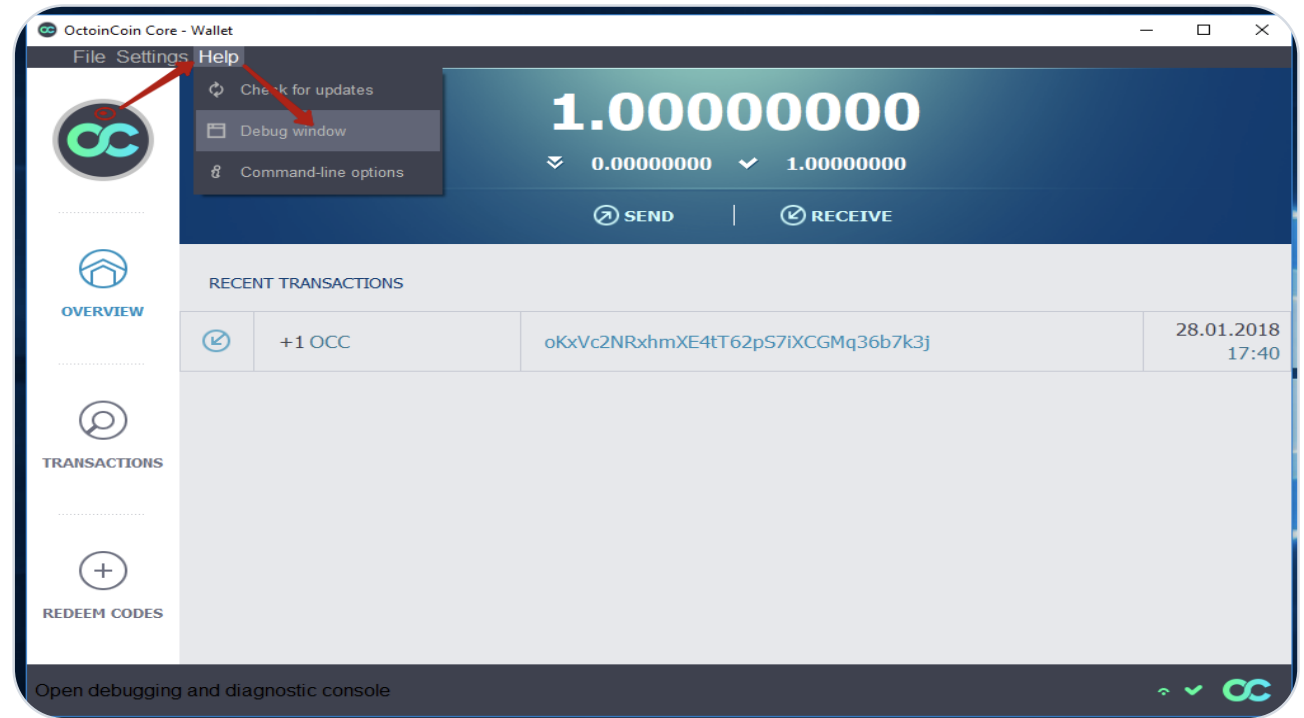

www.octoin.com

Attention!! Make a backup of your wallet before starting the removal process!! Completely removing the wallet without previously saving it, will destroy all your OCC coins!!

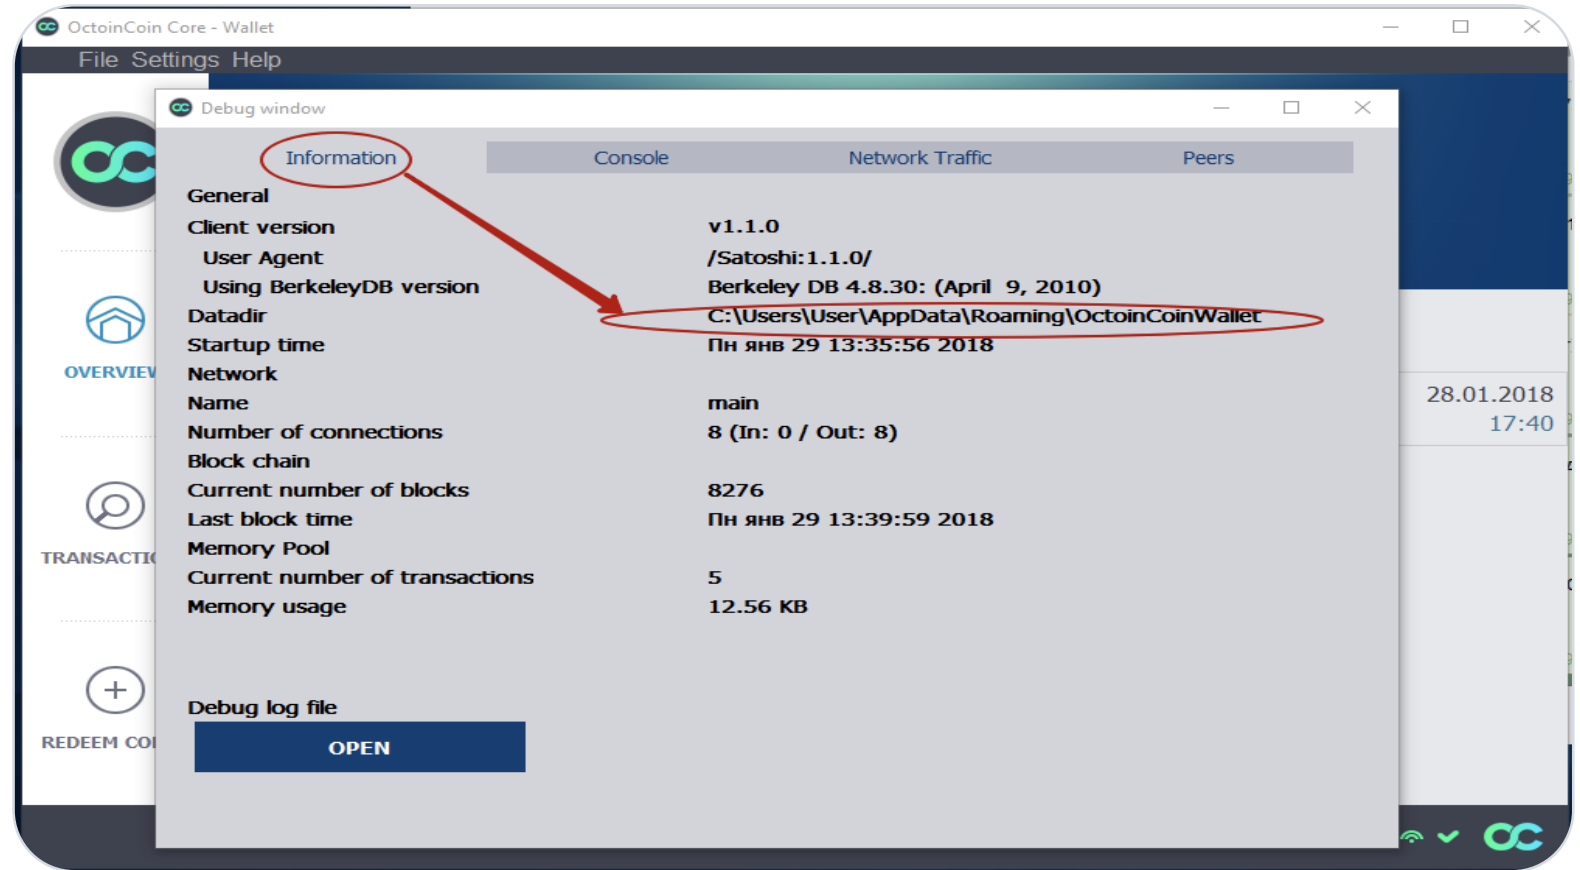

In order to completely remove the OctoinCoin wallet, you must find and delete all files of this wallet from your computer. Let's see how to remove it in the Windows version.

Start the wallet on your computer, click on the Wallet Logo icon to display the menu and then click HELP, select the DEBUG WINDOW tab.

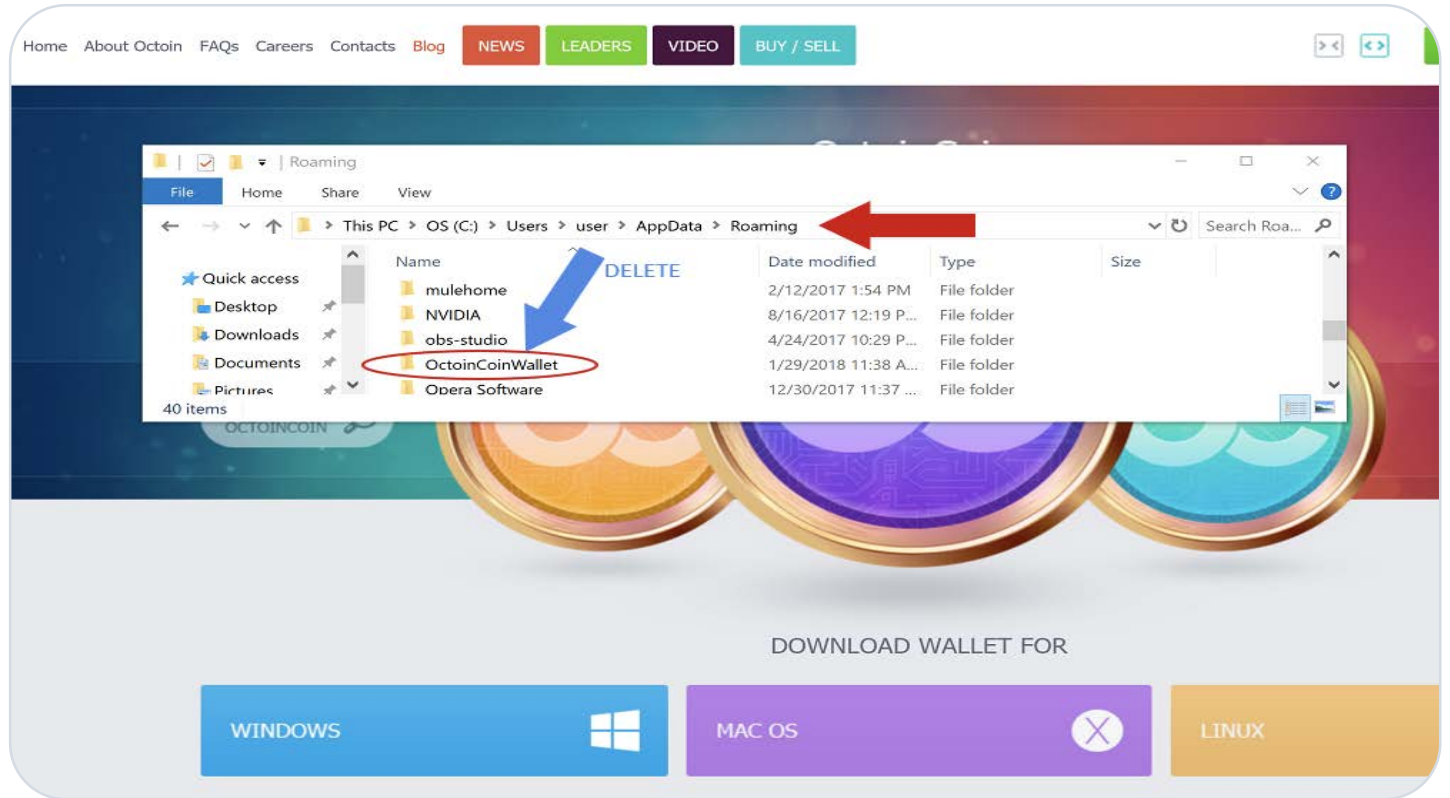

In the window that opens, go to the INFORMATION tab. At the right part of the window (see the arrow) there is a link to the directory where you need to delete all files.

You must copy the location of the folder - from the Datadir line and search for this folder on your computer using explorer Explorer - C: \ Users \ User \ AppData \ Roaming (where User-name is the user on your computer).

Find the folder OctoinCoinWallet, right click on it and select Delete.

After removal, clear the trash and proceed to download the new version of the wallet.

**A warning!! Make a backup of your wallet before starting the removal process!!
If you completely remove the wallet without previously saving it, this process will destroy all your OCC coins!!**
