**Restoring the wallet from a backup**

[www.octoin.com](http://www.octoin.com)

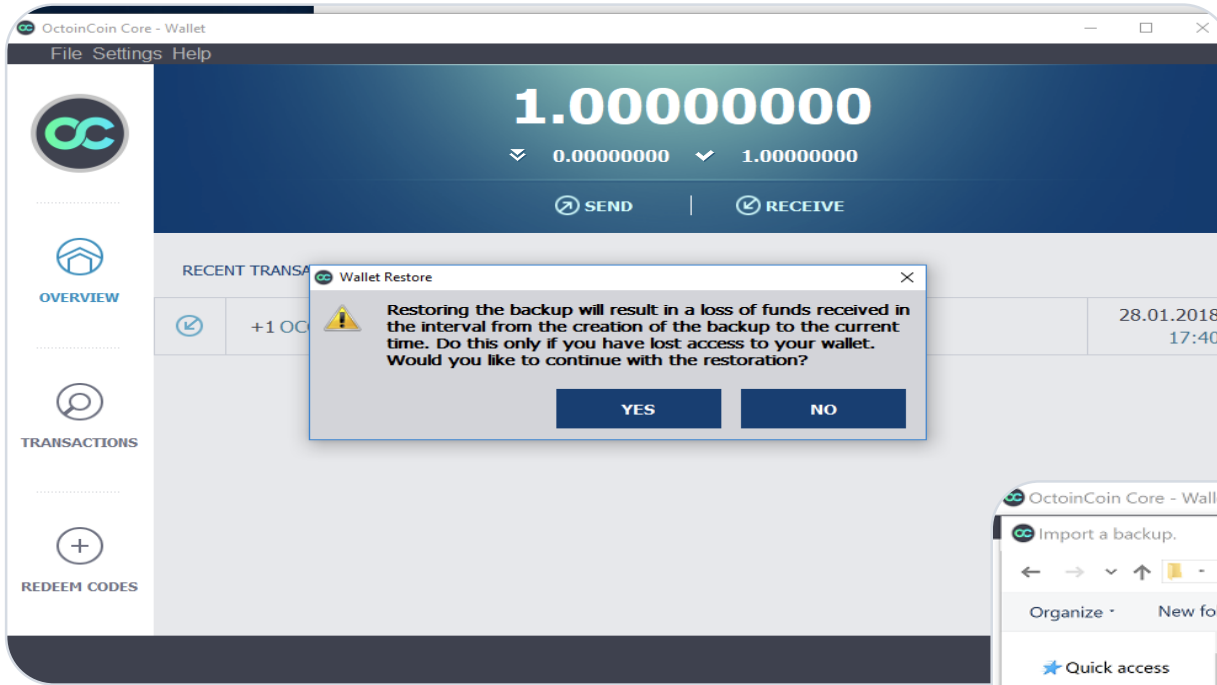

To restore a wallet from a backup, you need to press RESTORE WALLET in the FILE menu.

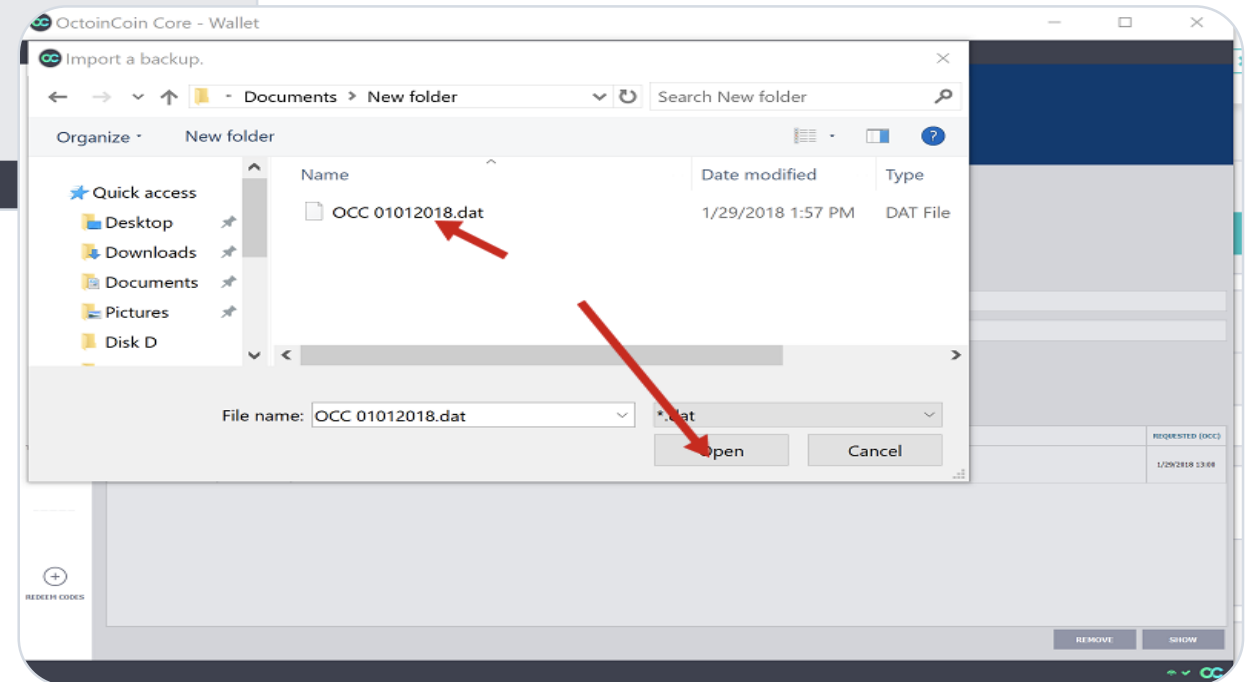

In the window that opens, press YES to confirm your agreement that this procedure will erase all available information about wallet transactions from the moment of its creation until the current backup copy.

Restoring the wallet from a backup

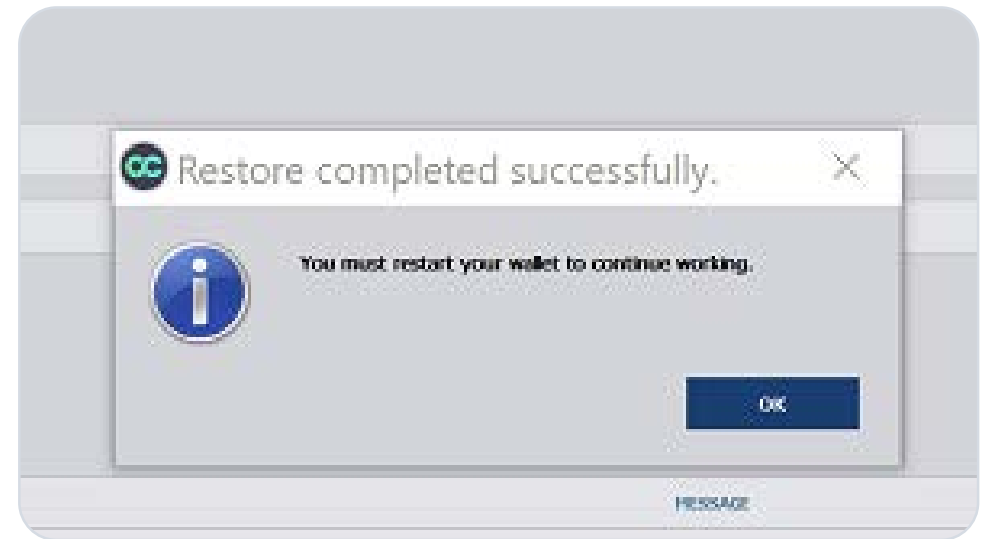

Select the location of the backup file and confirm that you want to open it.

A new window will appear. It will confirm the recovery from the copy after the wallet is restarted.

After clicking "ok" your wallet will be disabled. You will need to restart the application. Thus, you will restore your funds from the backup copy of your wallet.
